Ulan

Muschka Karanberg now eight years of age, on January 20, 2014, has produced seven puppies on October 25, 2013 (pictured here), to Bruno vom Wallensener Hof (featured in the following page).

Ulrich

Umay

Ulla

Usain

This combination acknowledges no immediate line breeding between sire and dam descendants until Alf Nordfelsen in the eleventh and fourteenth generation.

Alf Nordfelsen was widely acknowledged at that time as providing the improvement factor for the breed particularly in nerve and character condition. He was awarded the Deutsche Sieger title in 1955 by President Kasper Koezmair.

Alf's influence has been very evident down through the generations and is still evident today in the vast majority of high ranking iPO3, and Auslese breed conformation dogs competing in the Bundessiegerprüfung, WUSV iPO3 Weitmeisterschaft and Bundessiegerzuchtschau.

KARANBERG

Bruno vom Wallensener Hof – IPO 2 Kkl.1“v”

Mr Kris Kotsopoulos writes -

Very rarely there comes a dog that ticks all the boxes and truly represents the ideal German Shepherd Dog in Character and Type. It is with great pleasure I announce that Bruno vom Wallensener Hof is coming to Australia.

Mr Darryl and Cherylyn Willis from GRANDWEST KENNELS Australia have purchased Bruno from Dennis Rohde in Germany and graciously asked that I test him before his arrival into Australia to ensure that he is of the calibre our country requires.

I am happy to announce that Bruno fits into our model of correct German Shepherd Dog character. He is intensely driven, processes a crushing grip, has strong nerve, assertive when stimulated yet stable and uncomplicated around people, with the added bonus of excellent conformation and outstanding pigment.

Reprinted with kind permission - Darryl and Cherylyn Willis - darryllwillis@bigpond.com and Kris Kotsopoulos - info@vonforell.com
